

Outdoor Siren

The SE204 operates as an outdoor siren powered by either DC power or batteries. Its noticeable presence acts as a visual indicator of an installed alarm system, serving as a deterrent to potential intruders. Once an alarm is triggered, it promptly notifies the surrounding area with a powerful 110-decibel piercing sound and a flashing red light. Its exceptional compatibility with the U-Net family of security products makes it well-suited for integration with smart home cloud-based platforms.
