

DHI-HY-1200 Addressable Manual Call Point

- Convenient wiring: Two-wire, polarity-free
- · Reliable communication: Built-in microprocessor, performance is stable
- Ultra-low power consumption: Ultra-low monitoring current and alarm current
- · Independent output: A pair of normally open contacts
- Simple installation: With a plug-in structure, easy to install and construct

System Overview

DHI-HY-1200 Addressable Manual Call Point is a mated product of the Addressable Fire Alarm Control Panel, pressing the manual call point to send alarm signals to the panel.

Functions

Fast response

When there is a fire alarm, manually press the button, the alarm signal is sent to the control panel within 1 second.

Normally open contact

Features a pair of normally open contacts, providing an activation signal to other devices.

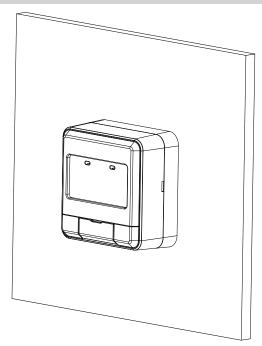

Scene

It is suitable for residential and industrial buildings such as hotels, shopping malls, hospitals, office buildings, schools, banks, libraries, factories, and warehouses.

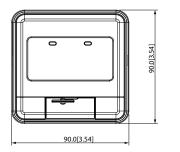

Technical Specification

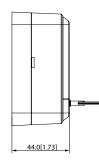

Electrical		
Working Voltage	DC24V	
Current	Monitoring current: ≤ 100μA Alarm current: ≤ 170μA	
Contacts Capacity	DC30V/100mA	
Indicator	Fire Alarm Red indicator flashes slowly during polling, flashes quickly during malfunction and remains lit during alarm Phone Red indicator flashes during polling and communication	
Communication		
Wiring	Two-wire, polarity-free	
Addressing Method	Electrical encoder	
Address Range	1–254	
Communication Distance	1500 m (4921.26 ft)	
Environment		
Operating Temperature	-10°C to +55°C (+14°F to +131°F)	
Storage Temperature	-20°C to +65°C (-4°F to +149°F)	
Operating Humidity	≤ 95% RH (no condensation)	
Construction		
Color	Red	
Dimensions (with base)	90 mm × 90 mm × 44 mm (3.54" × 3.54" × 1.73")	
Weight (with base)	136 g (0.30 lb)	
Certification	GB 19880-2005	

Installation

Dimensions (mm/inch)
