

Intercom

***The new Intercom System
Where Vision meets Vigilance***

Step into a world of enhanced security and convenience with the Provision-ISR intercom system. Whether working at the office or occupied with tasks at home, our intercom empowers you to effortlessly manage visitors without missing a beat. From the comfort of your desk or sofa, you can greet guests, grant access, and stay informed about who's at your door, ensuring security and peace of mind with every interaction.

Video Intercom System

Meet the Intercom system, Provision-ISR Doorbell's Big Brother!
An innovative access control system combining cutting-edge artificial intelligence with advanced video communication technologies. Designed for commercial and residential use, with a user-friendly interface and commitment to safety and privacy, it will redefine how we approach access control in the modern era.

Your Identity, Your Key. The Video Intercom System that Recognizes You

Outdoor Station

Build in mic & speaker

2.4GHz WiFi support

PoE power input

Press and Call

IP 65

WDR

Our Intercom System utilizes advanced **Deep 3D facial recognition** for precise identification, paired with a **high-resolution WDR camera**, wide-angle **2.3mm lens**, **IR night vision**, and **2.4GHz Wi-Fi/Ethernet connectivity** for clear footage. With Power over Ethernet (**PoE**) for easy installation and compatibility with iOS/Android, which offers **local storage** (up to 256GB SD Card), it prioritizes privacy with end-to-end encryption, complying with **NDAA policies & restrictions**.

Configurable Access Control provides personalized security with customizable options for a **2-step authentication process**. The Built-in Microphone and Speaker offer crystal-clear **two-way audio** for seamless visitor interaction. A dedicated **Call Button** simplifies communication, granting direct access to corresponding monitors (up to 8), the **Cam2 App**, and the Ossia VMS system. Additionally, the Intercom System's Weather-Resistant Design, with an **IP65 rating**, ensures durability in all weather conditions.

Access Capabilities

PIN Code
Allows entry via secure PIN codes

RFID
Supports proximity cards, including Mifare (13.56MHz) and EMC (125MHz), for convenient keyless entry, ideal for residential complexes, offices, and commercial spaces.

Advanced Face Recognition
Utilizes cutting-edge 3D deep facial recognition technology for precise authentication.

Indoor Station

With its **standalone functionality**, the 7" frame monitor is an independent powerhouse, yet when paired with our Intercom, it transforms into the **ultimate control center**.

Equipped with advanced features, this indoor monitor unit serves as a central hub for surveillance camera integration, offering live views of up to **4 cameras simultaneously**, and with **two-way audio**, one-way video, and **door-unlocking capabilities**, it provides unparalleled convenience and functionality.

The monitor supports microSD cards up to 256GB for **local storage**, automatically capturing snapshots of callers and recording video footage for later review. You can enjoy a personalized experience with **custom ringtones** and a **do-not-disturb option**, and with connectivity options like Ethernet, **PoE**, and **2.4GHz Wi-Fi**, as well as **8 alarm inputs** for sensors, stay informed and in control at all times.

Putting it Together: How it Fits

Wireless Intercom: Effortlessly welcome guests with our sleek front gate Intercom Station, wirelessly connected for simple setup.

CCTV Cameras: Equipped with built-in analytics for advanced alerts such as sterile area, line crossing, and other advanced features like "no parking zone," ensuring comprehensive security.

Network Video Recorder (NVR): Our vigilant Network Video Recorder (NVR) records every captured moment behind the scenes.

Wireless Monitors: Easily control your CCTV system and outdoor intercom station from convenient monitors in your kitchen, bedroom, and beyond.

Applications Scenarios

Residential Security

Commercial Properties

Educational Institutions

Healthcare Facilities

Government Buildings

Specification Highlights

Outdoor unit

- Max. resolution: **2MP** (1920×1080 25/30FPS)
- Lens: 2.3mm with a wide field of view 132° Horizontal
- True WDR (120dB), BLC, HLC, ROI
- 3D Face Detection & Face Recognition Technology
- Access control function supporting Mifare & EMC RFID proximity cards
- Wireless 802.11b/g/n 2.4GHz
- 2-Way Audio Built-in Microphone & Speaker
- 2m IR LED lights
- Tampering alarm support
- Remote Monitoring: IE Browsing, VMS Software, Provision Cam2 Mobile App
- Door Lock support; Door Sensor Support; Open Door Button
- **IP65 Rating** - dust ingress and water jets

Indoor unit

- Screen Size: 7" IPS **Touch Screen**
- Max. resolution: 1024x600
- Brightness: 300cd/m2
- Compression: **H.265+ / H.265 / H.264 / MJPEG**
- SD Card: Manual Record (**up to 256GB**)
- 8CH input
- Wireless 802.11b/g/n **2.4GHz**
- **2-Way Audio**: Built-in Microphone & Speaker
- **ONVIF** Support
- Weight: ~360g
- Power: DC12V/~200mA / **PoE**/~6W
